TOUCHÉ CONTROLS

WALL STATION - COLOR TOUCHSCREEN

DESCRIPTION

The WS-TS-C is a configurable wall station with a color touchscreen display. This wall station utilizes a high resolution backlit display for easy to read button information. A simple gesture page swipe is used to switch pages between scene control and zone control.

FEATURES

- Each wall station is configurable with multiple buttons per page and multiple pages per wall station.
- Default pages include: scenes page, zones page, and special function page. Unused pages, or pages that include functionality that is not desired, can be hidden.
- Switch lockout feature requires a 4-digit pass code for access to the switch's functions, when enabled.
- Multiple button types including: scene selection, zone selection, and momentary action. Each button supports pre-defined and user-defined labels.
- Display is a 4.3" TFT display, 272x480, premium brightness, 16.7M colors.
- Capacitive multi-touch interface with page swipe gesture control.
- Dimmable backlight, Sleep mode capable.
- Fully integrated with other components of the system to properly display the current state of the lighting in the controlled area. Coordination is automatically generated through the easy-to-use Windows® based system configuration software for master interface based systems or via the Touché Room Manager smart phone application for room manager based systems.
- All power and communication is done through a low voltage CAT5 daisy-chained cable. No additional cabling or sources of power are required.
- Switches fit into standard single-gang electrical junction boxes (junction box not included).
